

Opening machine

Uses and characteristics:

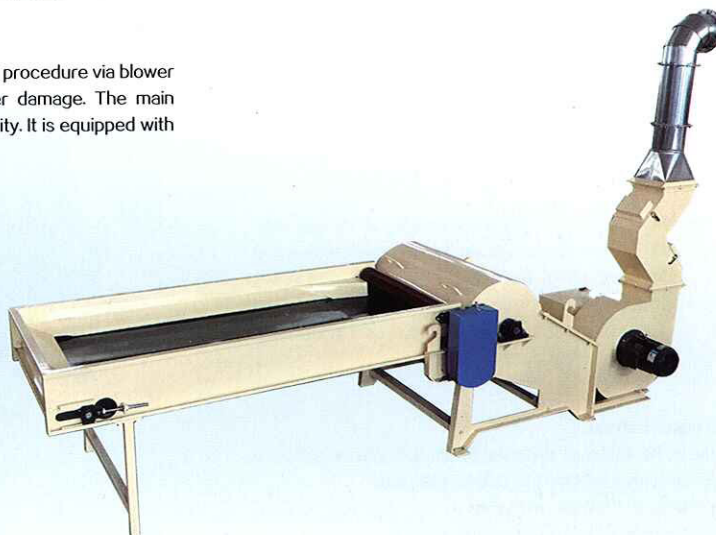

To loosen all kinds of fibre in bundles, then transfer them to next procedure via blower fan. The pre-opening is by notch-style roller to reduce fiber damage. The main opening is by card wire plate with high efficiency and good quality. It is equipped with strong magnet to absorb metal impurities.

Main specifications:

Machine width: 1000mm (1300mm, 1500mm)

Production capacities: 100-160kg/h

Power: 7kW

Cotton feeding machine

Uses and characteristics:

To mix the opened fiber and transfer the even cotton layer to next procedure. Photoelectric constant-weight control and vibrating plate make the feeding quantity even and accurate.

Main specifications:

Machine width: 1400-2350mm

Production capacities: 30-250kg/h

Power: 2.25-3.3kW
