

Stiff wadding/glue free wadding production line

Uses and characteristics:

The stiff waddings produced by this machine unit is replacement of sponge, used for exclusive mattress, sofa cushion, tatami, filtering material and acoustic felt, etc. The stiff waddings dryer adopts stainless steel chain plate structure, to ensure the smoothness and flatness of product surface.

Main Specifications:

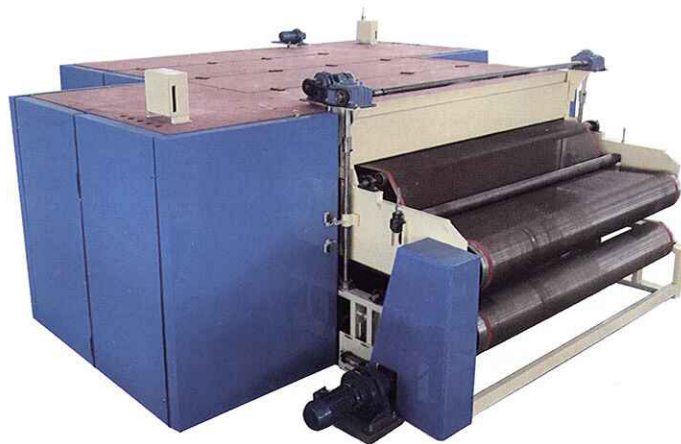

Product net width: 2300mm, 2500mm

Product specification: 60~6000g/m²

Production capacities: 80~300kg/h

Heating source: heat-conducting oil, direct ignition, electricity heating.

Stiff wadding oven

The stiff/hard wadding oven is electric heating, hot air circulation heating method. Oven interior has two layers with Teflon network transmission, to ensure the products' surface smooth and flat.

Main Specifications:

Width: 2200mm

Oven length: 4000mm

Power: 156kW
