

Ultrasonic quilting machine

ULTRASONIC QUILTING MACHINE

Characteristics

The latest ultrasonic quilting machinery in China. No thread and needle, beautiful outer appearance of the products, all kinds of dimensions to keep up with the popularity, changing the patterns according to the needs, strong seal and high production efficiency.

Application cases

Producing the compounding of spout gum cotton, non-woven fabrics and needle cotton with chemical fiber fabrics, artificial leather products. The patterns can be designed as your pleasure. It is applied to the production of fabrics for garment, bed spread, pillow, sofa and indoor decorations.

Basic components

1. Adopting the latest ultrasonic control box with strong and stable power. It is suitable for long-time and continuous work. Built-in PC chip and multi-circuit ultrasonic protection system to make the main machine run safely and steadily.
2. Structure of machine: 1)Pattern press compound machine, 2)Ultrasonic control cabinet, 3)End products rolling machine, 4)Fabrics feeding rack.

Specifications:

Power supply: AC 380V 50Hz

Total power: 8kW

Capacity: 0-12m/min

Effective width: 1000mm-3000mm(can make to order)

Ultrasonic mould: use imported magnalium mould

System control: PLC
